1. In addition to the composite space requirements that you developed based on our staffing complement, the Office of Research and Development will need facilities space to maintain an artificial intelligence, high technology and imagery exploitation laboratory. This will be comprised of two separate sections (main frame and associated workstations) which must be contiguous. From the standpoint of office efficiency, the facilities should be adjacent to our main office space. This includes our registry, DAC and technical research library.

2. A summary of our overall facilities requirements follows:

*a. Physical Facilities (Main-Frame Housing)

Sq.Ft.

- (1) Artificial Intelligence
- (2) High Technology
- (3) Imagery Exploitation/Understanding
- (4) Signal Analysis & Processing
- (5) WANG Central Processing Unit

b. Registry, DAC and Technical Research Library

*c. Facility Workstations and Stand-Alone
Micro-Computers
